

~~CONFIDENTIAL~~

30 AUG 1974

MEMORANDUM FOR: Chief, Technical Security Division
SUBJECT : Worldwide Hostile Audio Threat Assessment

1. Attachment A is a proposed action plan for the accomplishment of this objective. Milestones (1) and (2) have been accomplished with ORD/DDS&T incorporating a site vulnerability index method into the Resource Allocation Study. No additional funding is likely to be required to accomplish this objective.

2. Additionally, the R&D Subcommittee is directing its attention to this subject and will provide a forum for this effort.

3. The Technical Proposal from [REDACTED] dated 1 August 1974 includes the following:

25X1A5a1

- a. A method for developing an ACM detection effectiveness index
- b. A method for developing an ACM protection effectiveness index
- c. A site vulnerability index
- d. A total site security index
- e. Development of a practical scheme to permit description of the total threat used to evaluate the security level of a site.

4. The end products of the threat assessment are summarized in Attachment B.

5. I believe that the proposed action plan and the efforts accomplished to date are sufficient to warrant formalizing this action plan.
